

The IFH Group: Specialist in Custom Fuel Tanks and Hydraulic Oil Reservoirs

Hydraulic oil reservoirs and fuel tanks are critical components for off-road vehicles. Reliability, durability and performance to exacting specs are essential.

The IFH Group (for Innovative Fluid Handling) is the largest manufacturer in the USA of custom fuel and hydraulic oil tanks for off-road and specialty vehicles. Applications include combines, heavy terrain forklifts, earth boring equipment, boom cranes, grounds keeping equipment, end loaders and hay bailers. Fuel tanks and hydraulic reservoirs range in capacities from 1 to more than 300 gallons, and are manufactured from steel, stainless steel, aluminum or aluminized steel.

We offer an engineering staff dedicated to working for you to manufacture a reservoir or tank that not only meets your needs but also is designed with manufacturing in mind. We offer a streamlined production process that will assure you get the best value for your investment. And we offer assembly services that enable you to receive a reservoir or tank complete with all the additional equipment you might need.

hydraulic reservoir for telescopic handlers

fuel tanks for oil & gas equipment

IFH Group offers quality hydraulic reservoirs for the off-road equipment industry and other fluid power applications. We custom build your hydraulic reservoirs, specializing them to fit the needs of your application. Custom made hydraulic reservoirs have an advantage over off-the-shelf reservoirs because they can be designed to fit your exact space and technical requirements necessary for the optimal performance of your end product.

IFH has recently completed its 2nd major expansion, increasing the company's overall square footage from 106,000 to over 127,000 under one roof. The recent addition houses IFH's non-ferrous manufacturing lines, stepping up the company's capability for the production of aluminum sheet steel for its reservoirs, tanks and other custom fabrications. The addition has enabled IFH to streamline all areas of production from incoming raw materials to shipment of completed fabrications and tanks in order to shorten the lead times to customers.

IFH has expanded its non-ferrous production capacity for applications that require custom aluminum fabrications.

HYDRAULIC RESERVOIRS + FUEL TANKS = IFH GROUP.

- Custom Solutions for Mining Equipment
- Capacities from 1 to >300 Gallons
- Aluminum & Steel: Mild, Stainless & Aluminized
- Clean & Pressure-Tested Product
- Powder Coating, CARC & Sub-Assembly for Finished Product
- General Metal Fabrication & Weldments Also Available
- Made in U.S.A.

3300 East Rock Falls Road, Rock Falls, IL 61071

IFH Builds Better Tanks.

Everything you need for your hydraulic and diesel fuel needs:

- Engineering & Design
- Custom Assembly & Sub-Assembly
- State-of-the-Art Manufacturing
- High and Low Production
- Capacities from 1 to > 300 Gallons
- Range of Materials from Steel to Aluminum
- 100% Tested for Leaks and Cleanliness
- On-Time Delivery & Made in USA
